Olivetti Lexikon 83,

The world's most advanced electric portable.

olivetti

Olivetti Lexikon 83, uniquely Olivetti.

Interchangeable typing element

The little ball with the red head is an interchangeable typing element. It lets you change your typestyle in seconds without changing typewriters, even in the middle of a letter (from bold pica or sophisticated elite to a beautiful script). It also does away with jamming keys to speed up typing.

Just pop one out and another in and the paper you type can look as distinctive as the ideas that are in them. You can use a business style for your business correspondence and switch to an informal style for your personal letters, in seconds.

Interchangeable ribbon cartridges

For even more freedom of expression, you can also change the color of the ribbon, instantly. The Lexikon 83 uses fabric ribbon cartridges that snap in, and the blue, black, red, green or brown ink won't smudge your fingers. For your executive typing, use the Multistrike Mylar Film cartridge ribbon (available in black only).

Functional keyboard

The Lexikon 83 has a standard American keyboard with 45 keys, a wide electric repeat space bar and a dual function electric repeat key with the x and underscore. Easy to use key-set tabulation is controlled from the keyboard.

Full size 12″ carriage

The wide 12″ carriage allows you to type on large envelopes and forms and lengthwise on 8½″ x 11″ stationery. The wide carriage offers the advantage of light duty office typing in your home.

Single element typing

Both the Deluxe Lexikon 83 and the companion model Lexikon 82 are major innovations in electric portable typewriters—the only electric portables with interchangeable typing elements and easy to change ribbon cartridges. What is more, the interiors of the Lexikons are engineered as smartly as the exteriors.

Additional features

Deluxe paper bail
with title centering scale
Page-end indicator
Half-space key
Transparent paper holder
Easy to use visible margin setting
Lateral paper guide
Erasure table
